

# GTN Background Information and Basics

|   |            |
|---|------------|
| <b>Overview .....</b>   | <b>i</b>   |
| <b>Using the GTN 750 Physical Controls (a.k.a. "Real Buttons and Knobs") ..</b>   | <b>ii</b>  |
| Switch control between the com and nav radio .....                                | iii        |
| Adjust the volume of the active com radio .....                                   | iii        |
| Adjust the com squelch .....  | iii        |
| Quickly tune the emergency frequency 121.5.....                                   | iii        |
| Tune a STBY com frequency with the knobs .....                                    | iii        |
| Swap the STBY com frequency to the active window.....                             | iii        |
| Adjust the volume of the nav radio .....  | iii        |
| Listen to the Morse Code identifier for a VOR or localizer .....                  | iii        |
| Tune a STBY nav frequency with the knobs .....                                    | iii        |
| Swap the STBY nav frequency to the active window .....                            | iv         |
| Return to the Home page from any page.....  | iv         |
| Return to the Map page from any page.....   | iv         |
| Navigate direct-to any waypoint .....   | iv         |
| <b>Using the Touch-Screen Controls .....</b>                                      | <b>v</b>   |
| General tips for the alpha-numeric keypad (on-screen keys).....                   | vi         |
| <b>Tuning Com and Nav Frequencies.....</b>  | <b>vii</b> |
| Tune a STBY com frequency .....   | vii        |
| Find a com frequency.....   | vii        |
| Monitor both the active and STBY frequencies.....                                 | viii       |
| Add a frequency to the User list.....   | viii       |
| Delete a User frequency .....   | viii       |
| Tune a STBY nav frequency .....   | viii       |
| Swap active and STBY com or nav frequencies .....                                 | viii       |
| Find a nav frequency .....  | viii       |
| <b>Controlling the Radios and Other Audio .....</b>                               | <b>ix</b>  |
| Show the detailed audio panel controls .....                                      | ix         |
| Select a radio for transmissions .....  | ix         |
| Monitor a nav radio .....   | ix         |
| Monitor a com radio while listening and transmitting on the other com radio ..... | x          |
| Toggle audio panel features on/off.....   | x          |
| Engage or disengage split mode.....   | x          |
| Put pilot on Com 2 and copilot on Com 1 .....                                     | x          |
| Adjust the speaker volume.....  | x          |
| Turn 3D audio on or off.....  | x          |
| Adjust volume or squelch for the intercom .....                                   | xi         |
| Replay the most recent com recording.....   | xi         |
| Select a specific com recording .....   | xi         |
| Adjust the playback volume.....   | xi         |
| Set a transponder code.....   | xi         |
| <b>Checking GTN Status.....</b>   | <b>xii</b> |
| Check the status screens on startup.....  | xii        |
| Check the system status after startup .....                                       | xii        |
| Check the GPS status.....   | xii        |

# GTN Navigation and Control

|  |           |
|--|-----------|
| <b>Navigating Direct-To Anywhere .....</b>                       | <b>1</b>  |
| Navigate from the present position direct-to a new waypoint..... | 1         |
| Navigate direct-to a waypoint in the current flight plan .....   | 2         |
| Navigate direct-to a nearby airport .....                        | 2         |
| Find a waypoint identifier you don't know.....                   | 2         |
| Navigate direct-to a map waypoint.....                           | 3         |
| Navigate direct-to a waypoint on a specific course .....         | 3         |
| <b>Using a Flight Plan to Navigate .....</b>                     | <b>4</b>  |
| Create a new flight plan and save it in the catalog.....         | 4         |
| Activate a stored flight plan .....                              | 4         |
| Show the active flight plan.....                                 | 4         |
| Delete the active flight plan .....                              | 4         |
| Invert the active flight plan.....                               | 5         |
| Invert and activate a stored flight plan .....                   | 5         |
| Preview a stored flight plan .....                               | 5         |
| Delete a stored flight plan .....                                | 5         |
| Add a waypoint to the active flight plan .....                   | 5         |
| Remove a waypoint from the active flight plan .....              | 5         |
| Activate a leg in the active flight plan .....                   | 6         |
| Graphically edit the active flight plan .....                    | 6         |
| Load an airway .....   | 7         |
| Collapse the waypoints in airways.....                           | 7         |
| Expand collapsed airways.....                                    | 8         |
| Remove an airway .....   | 8         |
| <b>Using OBS Mode.....</b>                                       | <b>8</b>  |
| Set a course with OBS mode and an external HSI.....              | 8         |
| Suspend automatic waypoint sequencing.....                       | 8         |
| Resume automatic waypoint sequencing.....                        | 8         |
| <b>Using User Waypoints.....</b>                                 | <b>8</b>  |
| Create a User waypoint .....                                     | 9         |
| <b>Adding IFR Procedures (DP, SID, STAR, IAP) .....</b>          | <b>9</b>  |
| Add a departure procedure to the active flight plan .....        | 10        |
| Activate a departure procedure.....                              | 10        |
| Delete a departure procedure from the active flight plan.....    | 11        |
| Add an arrival procedure to the active flight plan.....          | 11        |
| Delete an arrival procedure .....                                | 11        |
| <b>Loading and Activating Approaches.....</b>                    | <b>12</b> |
| Load an instrument approach.....                                 | 12        |
| Delete an approach from the flight plan .....                    | 13        |
| Change to a different approach to the same airport.....          | 13        |
| Activate a leg of an approach.....                               | 13        |
| Proceed direct-to an intermediate fix.....                       | 13        |
| Types of RNAV approaches supported by the GTN.....               | 14        |
| Specifics for ILS, LOC, and VOR approaches .....                 | 14        |
| Switch the CDI source sent to an external CDI.....               | 15        |
| Fly the published missed approach procedure.....                 | 15        |

|  |           |
|--|-----------|
| <b>Flying Visual (VFR) Approaches.....</b>                           | <b>16</b> |
| Load and activate a visual approach.....                             | 16        |
| Customize when the Visual button appears.....                        | 17        |
| <b>Flying Holds.....</b>   | <b>17</b> |
| Fly a charted hold in a procedure.....                               | 17        |
| Delete a hold (or course reversal) in a procedure.....               | 17        |
| Activate a leg from a charted hold to the next waypoint.....         | 18        |
| Create a custom hold at a waypoint in the active flight plan.....    | 18        |
| Leave a hold and resume waypoint sequencing.....                     | 18        |
| Leave a hold and proceed direct-to a flight plan waypoint.....       | 19        |
| Fly a published missed approach hold.....                            | 19        |
| Leave the missed approach hold.....                                  | 19        |
| <b>Flying DME Arcs and Radius-to-Fix (RF) Legs.....</b>              | <b>19</b> |
| Fly a DME arc that is part of a published procedure.....             | 19        |
| Fly an RF leg that is part of a published procedure.....             | 20        |
| <b>Using Vertical Navigation (VNAV) and Along-Track Offsets.....</b> | <b>21</b> |
| Enable VNAV guidance.....  | 21        |
| Disable VNAV guidance.....   | 21        |
| Set up a VNAV altitude constraint (crossing restriction).....        | 22        |
| Modify an altitude constraint.....                                   | 22        |
| Remove a VNAV altitude constraint (crossing restriction).....        | 22        |
| View or adjust the current VNAV profile or Flight Path Angle.....    | 23        |
| Change the default Flight Path Angle.....                            | 23        |
| Create a parallel track.....   | 23        |
| Cancel a parallel track.....   | 23        |
| Use VNAV while flying approaches.....                                | 23        |
| Key points for using VNAV.....                                       | 24        |
| <b>Other GTN Features and Customization.....</b>                     | <b>25</b> |
| Display the Home page and select a feature.....                      | 25        |
| Customize the Map page.....  | 25        |
| Quickly control detail shown on the map (declutter).....             | 25        |
| Configure the orientation and zoom levels on the map.....            | 26        |
| Customize the User fields on the map.....                            | 26        |
| Adjust traffic options.....  | 27        |
| Adjust terrain options.....  | 27        |
| Adjust weather display and options.....                              | 27        |
| Show and control optional approach charts and airport diagrams.....  | 28        |
| View nearest airports, intersections, VORs, and more.....            | 28        |
| Find waypoint information.....                                       | 28        |
| Use optional services.....   | 29        |
| <b>Using the GTN Utilities.....</b>                                  | <b>29</b> |
| View the Utilities page.....   | 29        |
| <b>VNAV and V CALC Options.....</b>                                  | <b>29</b> |
| Use V CALC instead of VNAV.....                                      | 29        |
| View trip planning information.....                                  | 29        |
| View fuel planning information.....                                  | 30        |
| Use the DALT/TAS/Winds calculator.....                               | 30        |
| Check RAIM.....  | 30        |

|   |           |
|---|-----------|
| Set a generic timer to count up or down.....                                      | 31        |
| Set a Trip Timer.....   | 31        |
| Set a Departure Time clock .....  | 31        |
| Create or edit a scheduled message .....  | 31        |
| Use the Clean Screen utility.....   | 32        |
| <b>Configuring the GTN .....</b>  | <b>32</b> |
| Check the GTN system status .....   | 32        |
| Check the GPS status and position accuracy .....                                  | 32        |
| Check the status of external devices connected to the GTN.....                    | 32        |
| Configure the CDI scale, date/time format, keyboard type, and other settings..... | 32        |
| Configure airspace and waypoint arrival alerts .....                              | 33        |
| Change the default units .....  | 33        |
| Change system audio volume.....   | 33        |
| Adjust the GTN backlight level.....   | 33        |
