

TABLE of CONTENTS

SECTION	CONTENT	PAGE
I.	Introduction	
	A. GPS Terms	1
	B. MFD Architecture	3
	C. Using a Different G1000W for the First Time	4
	D. Controls	5
	E. Upper Controls	6
	F. Lower Controls and Soft Keys	7
	G. AFCS Controls	8
II.	Basic Operations	
	A. Tuning Frequencies	10
	B. Direct-To a Waypoint (Spelling Method).....	11
	C. Cancel Direct-To Navigation	11
	D. Direct-To a Waypoint Shortcuts	12
	From a page with one waypoint	12
	From a page with multiple waypoints.....	12
	Panning from the Map Page	12
	Using City or Facility Name	12
	E. Direct-To Nearest Airport	13
	F. Any Waypoint in the Active Flight Plan	13
III.	Flight Plans	
	A. Creating by Spelling Method	14
	B. Creating with Point-n-Shoot Method	15
	C. Activating a Leg in the Active Flight Plan	15
	D. Creating with the Most Recent Waypoint List Method	16
	E. Creating by Using Airways	17
	F. Closest Point of a Flight Plan	18
	G. Change Views from Wide to Narrow	18
	H. Along-Track Waypoints Creating and Deleting	19
	I. Parallel Tracking Creating and Canceling	20
	J. Activating a Stored Flight Plan	21
	K. Activating a Stored Flight Plan in Reverse	21
	L. Deleting a Numbered Flight Plan	22
	M. Deleting a Waypoint	22
	N. Adding a Waypoint	23
	O. Storing the Active or Changed Flight Plan	24
	P. Rename a Stored Flight Plan	24
	Q. Departure Procedures (SIDs)	25
	R. Standard Terminal Arrivals (STARs)	26
	S. OBS Mode	27
	T. Holding	27
	U. RAIM and RAIM Prediction	28
	V. Vertical Navigation	29
	W. User Waypoints	32
	At Present Position	32
	Not at Present Position	33
	Delete a User Waypoint	33
	X. VOR Navigation.....	34

IV.	Approaches	
	A. GPS Approaches	35
	B. ILS Approach	37
	C. DME Arc Transitions	38
	D. VOR Approach Using GPS for Transition	39
Appendix A –	The PFD Screen and its Soft Keys	40
	Synthetic Vision.....	44
Appendix B –	MFD Screen – Navigation Map	45
	Page Menu – Map Setup – Map.....	46
	Weather	46
	Traffic, Aviation	47
	Airways, Land, Profile	48
	Declutter, Measure Bearing/Distance, Clear Stormscope Lightning	49
	Show Chart, Show CHRT Soft Keys, Show Profile View.....	50
	Map Page Soft Keys	51
	Checklists	53
	Traffic Map, Stormscope	54
	Weather Data Link	55
	Waypoint Group – Airport Information	57
	Intersection, NDB, VOR, User WPT Information	60
	Auxiliary Group – Trip Planning	61
	Utility	62
	GPS Status	63
	System Setup	64
	XM Radio	67
	XM Information	68
	Satellite Phone	68
	System Status	69
	Flight Plan Group	70
	Checklists	70
	Nearest Group	71
Appendix C –	Map and Approaches	73
Appendix D –	DP and STAR (KDFW)	74
Appendix E –	AFCS Variants	
	Cessna 207, Mustang, King Air C90/GT and TBM 850	75
	MFD Control Unit Cessna 207, Mustang, King Air C90/GT and TBM 850	76
	Cessna 350/400, Mooney M20M/R/TN and Diamond DA40/40F	77
	MFD/PFD Control Unit for the Cessna 350/400	78
	Control Units for the Cirrus Perspective	79
Appendix F –	Index	80

It will take some quality time for you to understand and appreciate the tremendous capabilities of the G1000W. When purchasing an aircraft equipped with the G1000W, you hopefully received some training, the Pilot's Guide and a CD of the G1000 trainer. Our manual combined with their trainer is the best combination for learning the unit while on the ground and not being distracted by the noise and interruptions inherent with flight.
